

Heart & Stroke Screening

HEART DISEASES account for about 950,000 deaths annually. As a whole, these diseases represent the No. 1 cause of death in the United States.

Stroke is also a deadly killer. About 500 people in the U.P. will suffer from a stroke this year, and 150 will die. The incidence of stroke can be reduced.

That's why Schoolcraft Memorial Hospital is proud to offer a...

Heart & Stroke Screening

PRE-REGISTRATION is required.

You should participate in this screening if there is a history of heart disease or stroke in your family. The screening will be conducted by health professionals from SMH. The screening will take about one-hour.

The screening includes:

- blood pressure check • carotid artery check • cholesterol test (non-fasting) • pulse check • health history • professional recommendations based on the screening results • diabetes testing.
